INNOVATIVE SOLUTIONS FOR BETTER PRODUCTS. THAT'S CRESCENT.

Ever since the introduction of its Crescent Adjustable Wrench in 1907, Crescent is a name trusted by generations of professional tradespeople The Apex Tool Group, LLC, is building on this trust by expanding the Crescent line to include other famous hand tool brands under the Crescent name.

All of these other brands have built remarkable reputations on their own. Together with the Crescent® brand, Crescent Wiss® snips, scissors, shears, and knives, Crescent Lufkin® measuring tapes andrules, and Crescent Nicholson[®] files and rasps, they offer professional tradespeople a comprehensive number of quality products that they can count on to produce professional results - all under the Crescent banner. With several hundred years of collective experience, Crescent and its supporting brands have proven to be "Trusted by the Trades."

TRUSTED BY THE TRADES

Crescent is part of the umbrella company Apex Tool Group, LLC. With 7.500 employees in over 30 countries and an annual turnover of more than USD 1,3 billion, the Apex Tool Group, headquartered in Sparks, Maryland, is a leading global manufacturer and supplier of high-performance hand and power tools, tool storage, drill chucks, chain and electrical soldering products for industrial, commercial and demanding do-it-yourself applications.

ATG designs, manufactures, markets, and sells proprietary brands, including GEAR-WRENCH®, Crescent®, SATA®, Cleco®, Weller®, and APEX® and also designs and manufactures a number of private label tool brands for retailers. ATG sells its products through direct, retail, professional and trade channels to customers in over 115 countries, and serves a multitude of global markets, including automotive, aerospace, electronics, energy, hardware, industrial, and consumer retail

CRESCENT

TRUSTED BY THE TRADES

The Professional's Standard in Cutting

The CRESCENT Wiss brand earns its reputation for craftsmanship and long life and has been doing so since 1848. Driven by two simple principles - performance and durability - the brand has remained the undisputed market leader in professional aviation snips. It is these two principles that have earned the trust of the professional tradesperson. The extensive CRESCENT Wiss line of products includes scissors, snips, and specialty trade tools.

NEXT GENERATION WISS SNIPS

Snips made to earn the trust of a new generation.

The New Generation Wiss Snips build off the success of the previous snips line and set the bar even higher: The next generation snips last 60% longer and require 20% less force to cut. That's why Crescent Wiss is the undisputed leading brand of snips for sheet metal professionals.

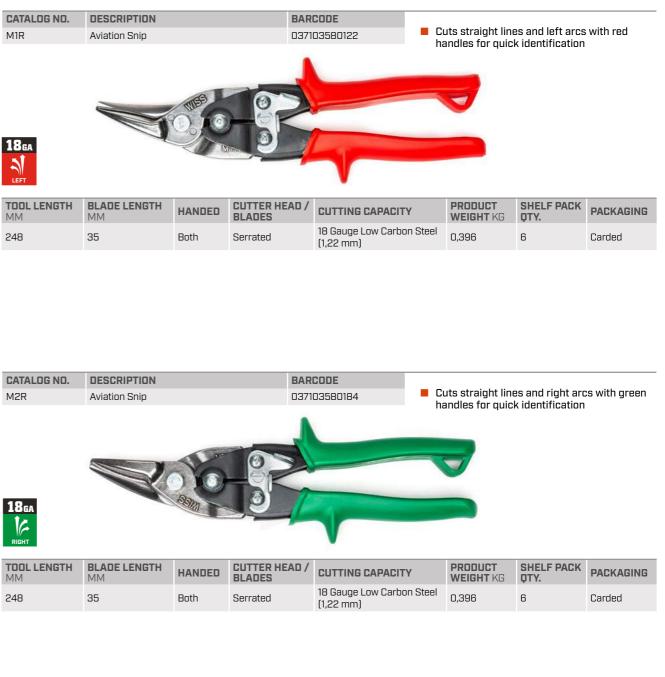

AVIATION SNIPS

- Blade serrations hold material firmly and spread cutting force uniformly across blade edge, improving cut quality and tool life
- Superior design prevents tears at end of cuts by controlling blade bypass; minimizes folding and burrs
- Cuts up to 18 gauge low carbon, rolled steel
- Spring-action handle for a faster, effortless feed Handles have built-in stops, providing consistent operation and blade opening

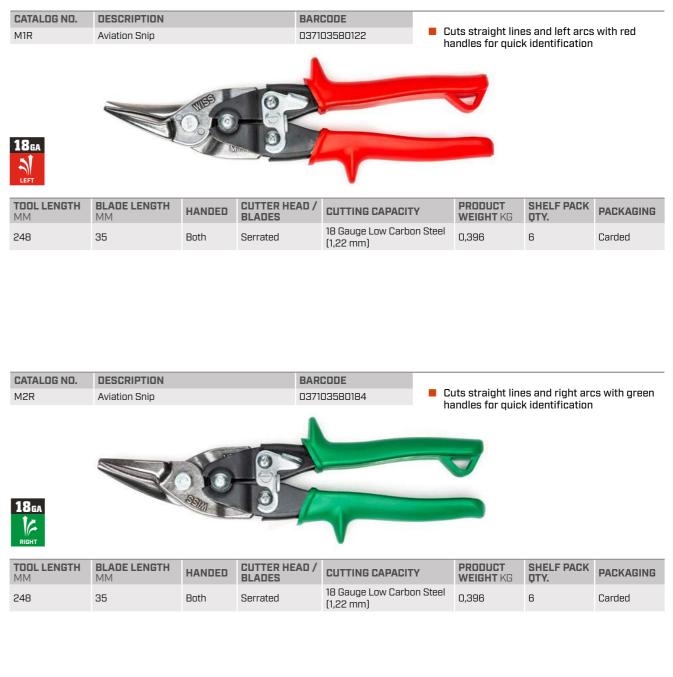

- Single-handed latch operation for left or right-handed USE
- Ergonomic, single material non-slip handle grips provide excellent control and easy cleaning with built-in hang hole for convenient storage
- Made in the USA

Integrated Handle Ring For hanging or easy storage Ergonomic Non-Slip Grips Provide excellent control and easy cleaning **Ergonomic Latch** For fast. single-handed operation with either hand ADE IN TH USA Improved Pivot Design Features built-in stops for consistent jaw opening and upgraded spring action for fast, effortless feed Precision Cast Blades Feature durable serrations that spread cutting force across jaw, improving cut quality and tool life

NOT JUST SCISSORS AND SHEARS...

Precision cutting tools made for pros.

The new and improved line of Crescent Wiss shears and scissors offers the performance, strength, and durability professional users need. Every scissor and shear has been upgraded with new features that deliver more comfort, superior results, and longer life. High-performance models feature titanium- coated blades for smooth, powerful cuts and several have a full metal core for maximum strength and durability.

HOME & CRAFT SCISSORS

- Precision ground blades feature premium grade stainless steel and are precision engineered for knife-like cutting edges
- Easy adjust pivot bolt allows quick and easy adjustment to fine tune cutting blade tension for optimal cutting performance
- Ambidextrous handle design features symmetrical handle ring contouring for comfortable right or left hand usage
- Stainless steel blades provide corrosion resistance and are harder than steel for durability and tool life
- Straight blades can be sharpened
- Hard plastic handles clean easily
- Lightweight

Highly accurate and reliable measuring tools

In 1869, Lufkin began manufacturing rules for the logging industry. Innovation became the focal point of its business. Today, Lufkin is a leader in producing premium quality measuring tools for tradespeople in numerous industries. The extensive Crescent Lufkin line of products includes power tapes, rules, long tapes, oil gauging tapes, measuring wheels, and one of the widest selections of special purpose tapes and rules available for commercial and industrial use.

CRESCENT LUFKIN SHOCKFORCE™ AND SHOCKFORCE NITE EYE™ MEASURING TAPES

Introducing the toughest tapes to ever hit a jobsite. Shockforce brings new meaning to the term high performance with a full 4,3 m / 14 feet* of standout and the ability to survive a 30 m / 100-foot drop. Add in a diamond coated 360-degree end hook that delivers 50% more gripping power, a two-sided blade with vertical markings on the back, and class-leading ergonomics and you have a tape that's destined to be the new standard for trade professionals.

But that's not all. There's also the Shockforce Nite Eye, with all the capabilities of the original Shockforce plus the Nite Eye high visibility green-on-matte black blade. Made for superior legibility in any light condition – from bright sun to dim interiors – Shockforce Nite Eye helps you measure even faster.

SHOCKFORCE NITE EYE™ TAPE MEASURES

- Matte black nylon-coated blade provides extended product life and improved legibility in varied light conditions
- Diamond-coated end hook grabs material from every direction and prevents slippage
- Narrow blade technology offers reduced weight for carrying
- Optimized drum and spring design provides a compact case that fits comfortably in the palm of your hand
- Drop tested from 30 m / 100 feet for real life, on the job durability
- Dual-sided blade printed with vertical quick read scale on underside for overhead and hard-to-reach measurements
- Full 4,3 m / 14 feet of standout
- Steel tether point offers increased safety capability when working at height
- Tether point can also be used for scribing and drawing arcs during layout

SERIES 500

- 3:1 gear ratio for fast winding
- Handle tucks away for convenient storage and transport
- Dual material case for added durability. Over mold surround allows for better grip with either hand
- Dual-sided printed blade with nylon coating for product longevity and versatility
- End hook clips into housing to prevent it from catching on items while in storage

NEW FIBERGLASS TAPES

- 3:1 gear ratio for fast winding
- Handle tucks away for storage and transport
- Durable plastic ring surrounding tapeline and tubular frame sections for added strength. Prevents fiberglass tape from getting dented or twisted
- Large, combination end-hook for versatility and one person use
- Dual sided printed blade with SAE and Engineer scales
- 40+ strand fiberglass to reduce blade stretching which leads to inaccurate measurements

MEASURING WHEELS

- Measuring wheel, dual foldable, up to 9999,9 mm
- Wheel diameter 160 mm, calibrated to counter
- Wheel brake and counter reset in handle
- Compact, foldable design
- Rubber molded handle
- Carry bag included
- Centimeters and Meters

- Reset trigger in handle and counter
- Braking trigger in handle
- Patented hinge mechanism handle for storage, folded size 530 mm
- 5 digit counter measures 10.000 m without resetting, 10 cm steps
- Built in kickstand wheel
- Large 305 mm wheel diameter provides more accurate measurements
- particularly on uneven terrain
- Comfortable handling, total length: 980 mm
- Centimeters and Meters

PEERLESS

- Designed for engineers and surveyors who prefer a 4-arm reel
- Reel is nickel plated, 4-arm, with rollers in each arm for smooth winding
- Dpen design construction aids in drying line and clearing out dirt
- Long, easy-action winding handle locks line in any position
- Chrome Clad[®] and yellow clad blade
- Blade 1/4 in wide and 0.016 in thick
- Pair of 580 finger rings and a 579 engineer's conversion rule are furnished with tape or replacement line

DRILCO

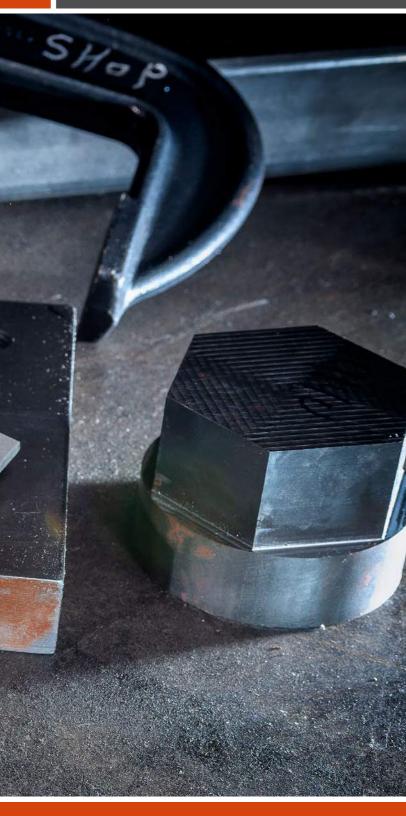

() CRESCENT NICHOLSON

an orth

Shaping

Files • Rasps • Sets • Specialty Files

TRUSTED BY THE TRADES

Tools with a heritage of quality since 1864

Crescent Nicholson[®] is a market leader for manual material removal products. As one of the world's first manufacturers of machine-made files, Nicholson is known for precision engineering and an uncompromising commitment to quality. The extensive Crescent Nicholson line of products includes files, rasps, and accessories.

DRILCO

FILE TERMINOLOGY

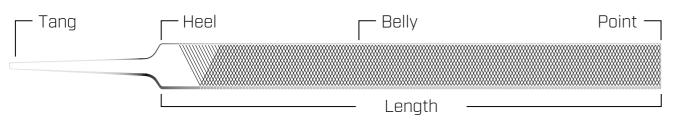

COARSENESS

- Smooth Cut
- Work to be accomplished, whether roughing or finishing, will determine type of teeth and coarseness for each application
- Most American pattern files are available with 3 grades of cut: bastard-cut, second-cut and smooth-cut
- The degree of coarseness is greater in longer files, but differences between bastard, second and smooth are proportionate

LENGTH

- Length is measured exclusive of tang, from point to heel, unless specified otherwise
- Desired stroke length, type of material and size will determine length required

SHAPE

Area to be filed will determine specific cross-section (round, square, flat, etc.) to be used.

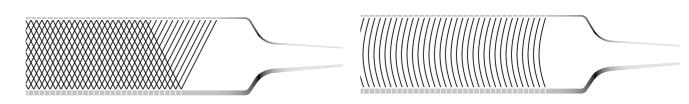

KINDS OF TEETH

SINGLE CUT

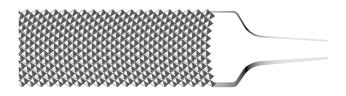

- Single set of parallel, diagonal rows of teeth
- Single-cut files are often used with light pressure to produce a smooth surface finish or to put a keen edge on knives, shears or saws

DOUBLE CUT

- 2 sets of diagonal rows of teeth
- Second set of teeth cut in opposite diagonal direction and on top of the first set
- First set of teeth is known as the overcut, second is known as upcut
- Upcut is finer than overcut
- Double-cut file is used with heavier pressure than the single-cut and removes material faster from the workpiece

RASP CUT

- Series of individual teeth which are formed by a single-pointed tool
- Produces a rough cut that is used primarily on wood, hooves, aluminum and lead

MAGICUT[®]

Single cut teeth divided by angular serrations into shorter cutting edges, which free themselves readily from chips and perform roughing and smoothing at the same time

CURVED CUT

- Teeth arranged in curved contours across the file face
- Curved-cut file is normally used in automotive body shops for smoothing body panels

DRILCO

SELECTION CHARTS

Find the right file or rasp for your job.

Simply find your requirements in the listing. The applicable files and rasps are listed accordingly.

AMERICAN PATTERN FILES

- Set includes 10 in half round bastard, 8 in mill bastard, 8 in flat, 10 in mill bastard, 6 in slim taper files
- General-purpose files for a range of home and professional uses
- Bastard-cut files are perfect for rough work and aggressive material removal
- Slim taper files are excellent for precision work
- Rubber-coated ergonomic handles for better comfort and control
- Includes pouch for storage and organization

AMERICAN PATTERN FILES

- File shapes and coarseness grades offer a range of shop uses for added versatility
- Complete set conveniently fits into rugged compact pouch for easy transport and storage
- Bastard-cut files are perfect for rough work and aggressive material removal
- Must-have file set for every machinist
- Includes pouch for storage and organization

DRILCO

FIT AND FINISH IN A SINGLE TOOL

These American pattern flat files have a bastard cut on one side for aggressive material removal and a smooth cut on the other for more precise finishing. Rough fitting and fine finishing capabilities are combined in a single file to help get jobs done faster.

2-IN-1 BASTARD AND SMOOTH CUT FILES

- American pattern flat file with bastard cut on one side and smooth cut on the other, providing aggressive material removal and precise finishing capability in one file
- Rectangular in cross section and tapers slightly towards the point
- Double cut on sides and single cut on edges
- Precision engineered to provide maximum material removal per stroke and long product life
- Special tooth construction reduces clogging

CATALOG NO.	FILE LENGTH	HANDLED
21908N	8 in / 200 mm	No
21910N	10 in / 250 mm	No

FLAT FILES

- American pattern files available in bastard, second, and smooth cut in a variety of the most common lengths
- Ideal for machinists, machinery builders, ship and engine builders
- Can be used effectively by repairmen and others who require rapid removal of metal
- Rectangular cross section allows you to smooth and sharpen straight surfaces, while slight taper in width towards the file's point creates ease of access in slots
- Double-cut on the sides for rough filing and single-cut on the edges for a smooth finish

HALF ROUND FILES

- American pattern files available in bastard, second, and smooth cut in a variety of the most common lengths
- Perfect for use on concave, convex, and flat surfaces
- Two-sided file is rounded on 1 side and flat on the other, so you can round out holes with ease
- Rounded sides of pipeliner files are single-cut, allowing you to quickly remove material from the work piece
- This pipeliner file from Crescent Nicholson features single-cut sides

MAGICUT[®] FLAT FILES

- American pattern flat Magicut® file
- All-purpose file is ideal for machinists and removes stock rapidly for a fast and efficient application
- Rectangular shape allows you to smooth and sharpen straight surfaces
- Narrow chip breaker pattern created by steep, angled serrations helps quickly remove material and provides a smoother finish
- Slight taper in width towards the file's point creates ease of access in slots

MILL FILES

- American pattern files available in bastard, second, and smooth cut in a variety of the most common lengths
- Sharpens mill or circular saws
- Great for draw filing and finishing metals
- Rectangular shape lets you smooth and sharpen straight surfaces
- Single-cut texture on the sides and edges for applying a smooth finish
- Two square edges allow you to make grooves fixed at the same width as the file
- All sizes taper slightly in width to improve access in slots

AXE SHARPENING FILES

- American pattern axe sharpening file
- Ideal file for sharpening axes and miscellaneous garden tools
- Rectangular shape has a large surface area for faster filing work
- Double-cut on one side for rough filing and single-cut on the opposite for finishing
- This file has two safe edges to work easily in restricted confines without damage

CATALOG NO.	FILE LENGTH	FILE CUT	HANDLED	PACKAGING	SHELF PACK QTY.

ROUND FILES

- American pattern files available in bastard, second, and smooth cut in a variety of the most common lengths
- Can be used to file circular openings or concave surfaces
- Single cut construction provides light removal of material and slightly smoother edges
- Slight taper in width towards the file's point creates ease of access in slots
- Round file can work in areas that a rectangular file cannot
- Safe point on round files helps reduce the risk of injury

ROUND CHAIN SAW FILES

- American pattern file with knurl cut
- Tighten tension on chain to firmly support cutters when filing
- Place file against beveled cutting surface of teeth 20° to 45° with saw
- File from inside to outside of cutter
- Sharpen all left-hand cutters on one side of chain and move to the other side and file all the right-hand cutters
- Check depth gauge height every 2 or 3 sharpenings
- Height between cutting teeth and depth gauge is between .020 in to .030 in
- Follow the manufacturer's specifications for safe usage

WARDING FILES

- American pattern files available in bastard and smooth cut in a variety of the most common lengths
- Used primarily by locksmiths in repairing and filing the ward notches in keys
- Thin rectangular shape lets you work on fine objects or in small areas
- Double-cut on sides and single-cut on edges for more versatile performance
- Also suited for use in narrow spaces where other files won't fit

Demolition Tools

Pry Bars • Rennovation Bars • Nail Pullers

Crescent - the iconic hand tool brand

Crescent[®] revolutionized the wrench category in the early 1900s with its introduction of the original adjustable wrench. That one advancement, in effect, replaced an entire set of dedicated-size wrenches. The brand remains true to its heritage of offering quality tools that solve real problems and continues to introduce new innovations across various professional and DIY product categories. Crescent[®] is the hand tool brand you can trust to get the job done faster.

DIYERS AND TRADESMEN ALIKE CAN COUNT ON THE DUAL CLAW WRECKING BAR FOR EVERY HOME RENOVATION PROJECT.

Dual Claw Design Position tool on joist and forks pry up with even pressure on both sides to quickly remove boards

Increased Leverage Less effort and faster action

> **Gripping Teeth** Assist in preventing board slippage

Deep Central Nail Puller **Qickly removes stubborn nails**

DEMOLITION

BULL BAR INDEXING DECKING REMOVAL TOOL

- Double fork design provides balanced lift on both sides of the nail for faster, cleaner, lower-effort board removal
- Rugged indexing joint allows for maximum flexibility and increased leverage
- Precision tips designed for fast access between boards and reduced damage for reclaiming materials
- Gripping teeth on forks assist in preventing board slippage
- Center nail puller allows better balance and more leverage
